

HYVINKÄÄ MAKES HYVINKÄÄ

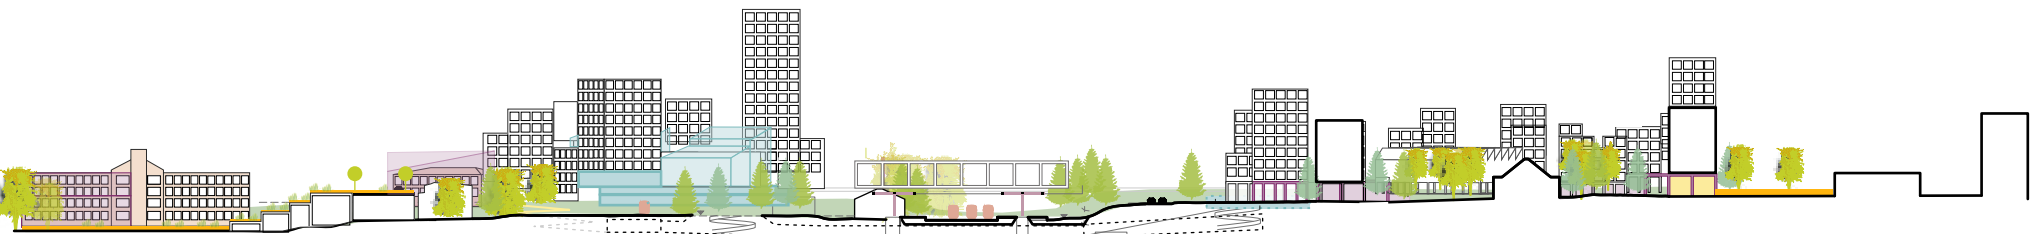

Symbiotic des: denoting a mutually beneficial relationship between different people or groups.

Hyvinkää makes Hyvinkää as a main strategy to create a new symbiotic city, between the nature and urban fabric. A productive enviroment with new interchanges happend in the loop boulevard which link the areas with the rest of the city giving and urban identity. Reveling the green to embrace the city into the nature, more human live creating a new proximities in the new productive third space.

Section A-B 1:200

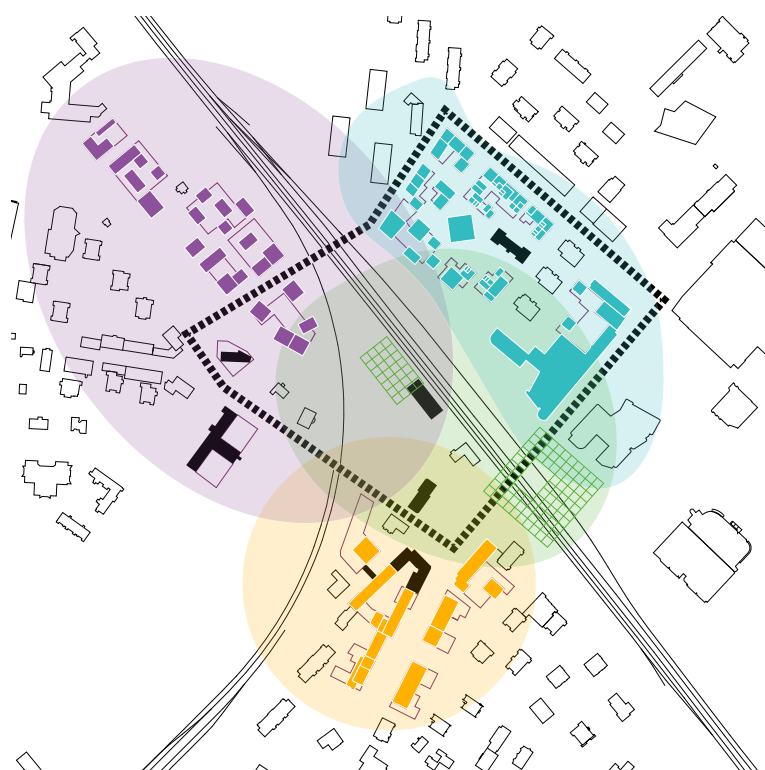

East and West: One Disctrict

Loop Boulevard strategy links the four areas into one district weel connected between them and with the rest of the city.

Sharing is weaving

Loop boulevard and green areas provide an active public space within the city in differnts layers, connecting the for areas and thestation.

Productive again

Each area is upgraded with a new identity and well connected between them through the loop boulevard.

Phasing

In the first phase of development, we implement the hub a new development near them. Phase 2, we crea-te the new bus station and the second development.

Phase 1
Phase 2
