

HUMAN SCALE: PROXIMITIES

The sense of community of the human scale create proximities within the symbiotic typology. Remaining a good quality and the nature of the environment and creating an urban identity it is the way to produce a healthy way of living. An open and active plinth connects both world, green and urban, where people can exchange activities and encounters people. Housing units allows typologies to fit different types of groups. Areal green roofs reveal a high landscape where the neighbours and citizens can meet.

In Between

The third space create a simbiosys between green and urban fabric, defining a productive way of life, the healthy live.
